What is a five-year plan?

A five-year plan is a list of personal or professional goals that you want to achieve within the next five years. It often includes ambitions with specific timelines and measurements. This short-term plan provides concrete goals to work towards and makes it possible to develop smaller goals to help you achieve your five-year plan's larger goals.

Why might this be important?

Having a plan, whether it is a five year, two years, or one year plan can increase the likelihood that you achieve whatever your goals might be. It's a way to clarify your goals, set timelines, and keep yourself accountable and focused on your achievements.

Steps to completing the five-year goal template

1. Come up with two additional areas in your life you'd like to set a goal for (health, relationships, recreational, etc.) and fill them in on the blank Goal boxes.
2. Think of an ultimate goal you would like to achieve in a specific area in your life (education, health, etc.) and place that in Year 5.
3. Come up with smaller goals that are achievable that will help you get to the 5-year goal.
4. Start with something that is easier, and slowly work your way up to the main goal.
